Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

CLAIMS

Summary

Claims 1,11 and 23 are the independent claims under consideration in this Office Action.

Claims 2-10 and 12-22 are the dependent claims under consideration in this Office Action.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4,7,11-14,17,20,21 and 23 are rejected under 35 U.S.C. § 102(b) as being anticipated by Badillo (6,152,057).

Badillo teaches a bobbin case comprising a wall structure 108 mountable on a support and having a tensioning element (figure 4) including a screw adjustable mounting plate and a depending body 126 with a surface such that a thread leaving the wall (at 116) is wrapped around the body 126 in a spiral fashion and whose tension is adjusted thereby with the application of friction between the thread and tensioning element. The tensioning element 124 comprises a rod or wire having a diameter and thread path such that it includes a longitudinal bend or curve and a U-shaped bend 138

or angled portion at the free end 136 for resisting the drawing off of the wrapped thread on the tensioning device.

ALLOWABLE SUBJECT MATTER

Claims 5,6,8-10,15,16,18,19 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

PERTINENT CITATIONS

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Clark illustrates a wire 26 for retaining a body of a bobbin holder. Kucmerosky illustrates a rod brake bar 15 for pressing against a bobbin. Zylbert illustrates a flexible plate 13 for allowing the wrapping of threads in a loop taker. Druffel illustrates a bent lever 8 for pressing against the bobbin.
